Forecast for Thursday 13 Aug 2020

Weather: A mainly dry but rather cloudy start then it will become brighter through the day with the best of any sunny spells developing across southern and western hills. Low cloud becoming more extensive through the evening.

Chance of cloud free mountain/hill tops above 800m: Little chance at first, and more generally across northern and eastern hills, with periods or persistent cloud above about 300 to 450m. However chances across southern and western hills improving to 90% by early afternoon with cloud above summits.

Visibility: Rather hazy under cloud and perhaps just a few kilometres in any drizzle and a few hundred metres in any low level fog patches, becoming very good in the south and west by early afternoon.

Met Office Aberdeen Meteorologist's View
Temperatures in the south and west may reach 21 or 22 Celsius by mid-afternoon.

Forecast for Friday 14 Aug 2020
Weather: Cloud increases again through the early hours with perhaps a little drizzle on northern and eastern hills and a few low level mist and fog patches. A mostly cloudy start but cloud, especially across southern and western parts, lifting and breaking to leave some good spells of afternoon sunshine.

Maximum wind: Variable, mainly easterly or northeasterly, 10mph or less

Chance of cloud free mountain/hill tops above 800m: Little chance at first with periods or persistent cloud above about 300 to 450m. However chances, especially across southern and western parts, improving to 90% by early afternoon with cloud more occasional above 900m.

Visibility: Rather hazy under cloud and perhaps just a few kilometres in any drizzle and a few hundred metres in any low level fog patches, becoming very good, especially in the south and west, early afternoon.

Temperature: **Glens:** Around plus 8 Celsius at dawn rising to plus 20 or 21 Celsius by day
At 800m: Around plus 10 Celsius
Freezing level: Above the summits
